Maplicity
internet mapping made easy

Maplicity MapImager™ provides Web browser-based interactive image analysis and visualization for ESRI's ArcIMS

Real-time image exploitation via the internet has arrived!

ON-LINE IMAGE ANALYSIS!

Maplicity MapImager is the revolutionary new product which allows Web browser-based users to perform interactive image analysis and visualization over the internet!

SIMPLE & EASY TO USE

Maplicity MapImager leverages all the great features of *Maplicity*™ for ESRI ArcIMS, including the easy and intuitive GIS user interface, enhanced query, graphics and legend tools, and simplified web server licensing, distribution, and maintenance.

EXPLORE IMAGERY

Select image(s), Simple zoom in/out/pan, Identify RGB, Zoom to scale

IMAGE OVERLAY/SWIPE

Overlay images and interactively swipe compare; Horizontal and vertical slide bars for full user control

BLEND/FADE/MERGE

Quickly and easily integrate, merge, and exploit multiple image themes with interactive blend/fade and morph controls

CHANGE BANDS

Change RGB channel combo's for improved interpretation, change detection, and image compositing

IMAGE ENHANCEMENT

Image enhancement controls for contrast, histogram equalization, standard deviation, and min-max stretches

SAVE RESULTS!

Create, save, and download enhanced geo-referenced image products from above processes

Maplicity

internet mapping made easy

Maplicity MapImager™ provides Web browser-based interactive image analysis and visualization for ESRI's ArcIMS

Simple and Easy to Use!

Now your entire organization can have access to simple and affordable image exploration tools via *Maplicity MapImager* and your ArcIMS Image Services!
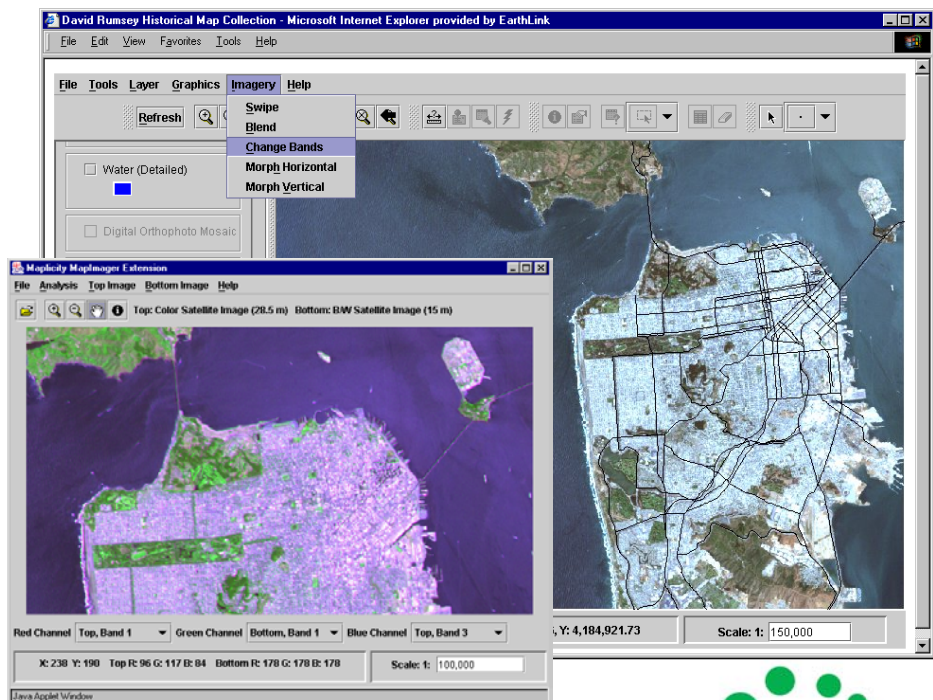

Powerful!

Built entirely with Java™ from Sun Microsystems, Inc., *Maplicity MapImager* offers unparalleled interactive on-line image analysis capabilities in an ubiquitous Web browser and operating system environment (IE, Netscape, AOL w/ Java 2 plug-in on Windows, Unix, Linux, and Mac OS-X).

Cross-Platform Compatible!

Seamless integration with *Maplicity*™ for full-featured GIS functionality, yet is amazingly lightweight (~300kb).

Integrated, Lightweight!

Optimized on-line client-server processing to quickly perform complex image manipulations that have until now required expensive desktop image processing software.

Optimized Client/Server Processing!

Licensing is by the Web server, not CPU or ArcIMS Spatial Server. Unlimited applet downloads (users) are permitted.

Cost-effective Web Server Licensing!

More than just a GIS Viewer…users can save and download georeferenced image products for easy integration with their desktop mapping/GIS applications!

Supports Raster & Vector GIS Data Download!

Customizable with MaplicitySDK!

Intuitive RS/GIS Interface!

On-Line Demo!
