MaplicitySDK includes 100+ Java classes, Javadoc, Users' Guide, and source code for the **Maplicity**TM and **OpenApplet**TM applets.

Enables rapid development and deployment of highly functional Internet RS/GIS solutions

Easily add robust image processing and visualization capabilities to spatial web sites

Built entirely with JavaTM technology from for unparalleled interactivity, cross-platform compatibility, and security

Simple and cost effective **Maplicity** web server licensing with unlimited client downloads for maximum scalability

Seamless integration with ArcIMS while requiring minimal knowledge of ArcXML

Package Descriptions...

Event handlers that assist in setting GUI tool state

Geometric Classes

Maplicity GUI Components

Symbology Classes

Image Processing Classes

Layer and Map Service related Classes

Coordinate Transformation Classes

Miscellaneous Classes

XML Processing Classes

MaplicitySDKTM includes source code for these two lightweight and powerful **MaplicityTM** applets which enable real-time Internet GIS and image visualization for ESRI's 

OpenApplet

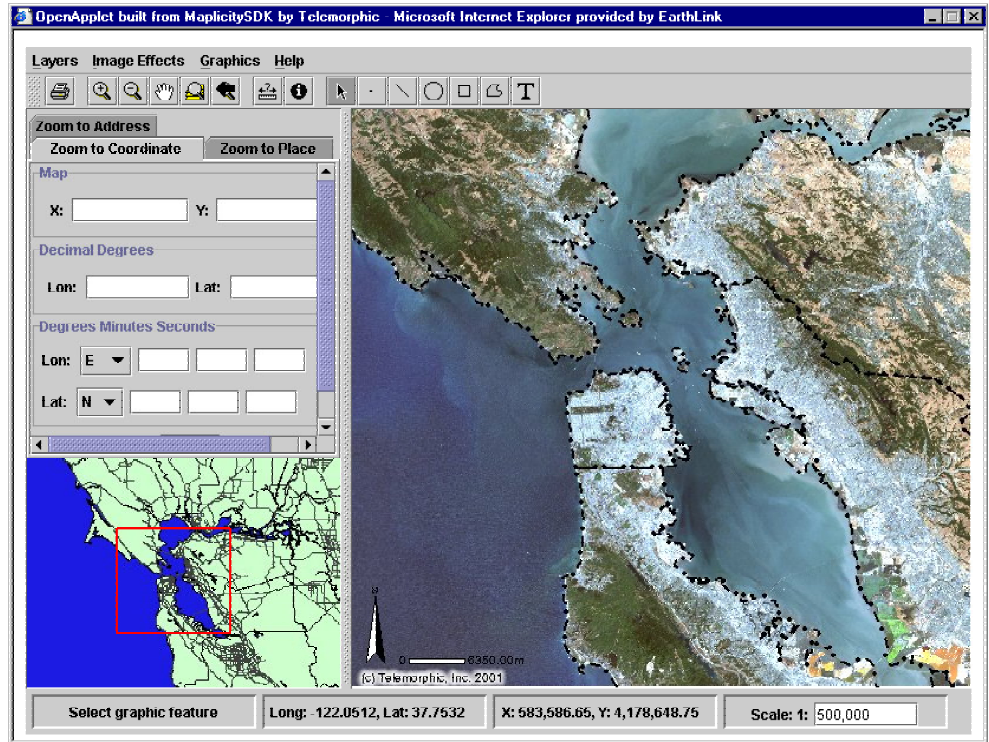

DESIGNED FOR NEW GIS USERS!

EASY NAVIGATION TO LOCATION OF INTEREST!

FUNCTIONALLY-SIZED OVERVIEW MAP!

INTERACTIVE IMAGE VISUALIZATION!

ADD GRAPHICS AND TEXT TO MAPS!

Maplicity

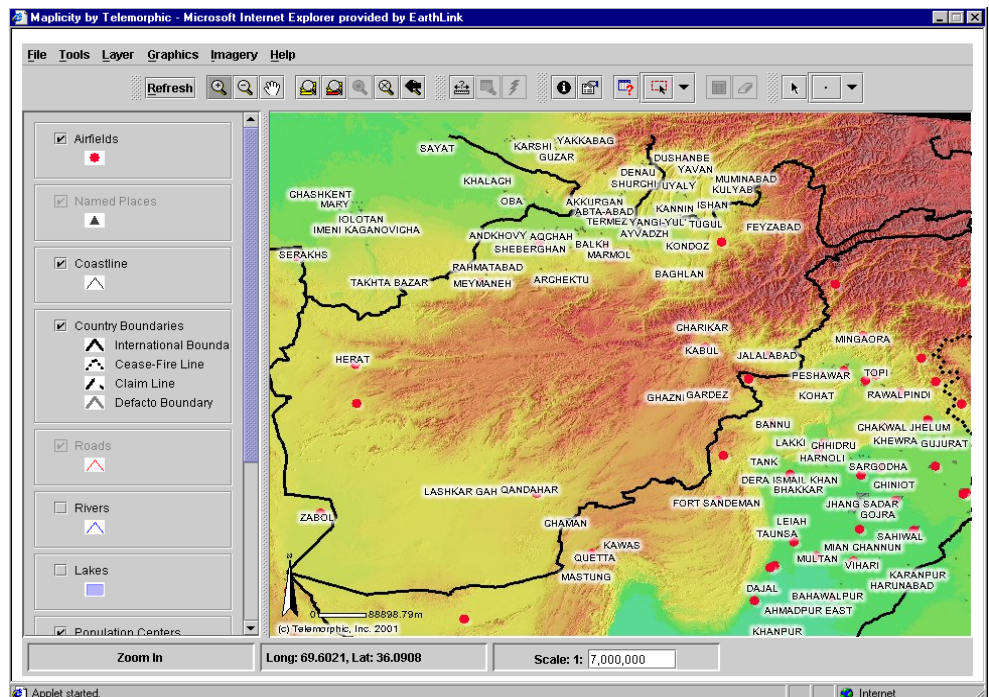

FULL-FEATURED DESKTOP GIS INTERFACE!

FULL LEGEND EDITING, LABELING, AND LAYER REORDERING!

COMPLETE IMAGERY AND ENHANCEMENT TOOLS!

SUPPORTS COMPLETE SPATIAL AND ATTRIBUTE QUERY OPERATIONS!

SUPPORTS VECTOR AND GEOREFERENCED IMAGE DOWNLOAD!

Contact us for a FREE needs assessment and current pricing!!
